SAP SETTLEMENT MANAGEMENT

Dashboard

Key Benefits

- Reduce Costs by implementing Customer & Vendor rebates by removing third party software and custom rebate solutions
- Use robust & standard SAP Settlement Management functionality in SAP ECC and S/4HANA. No extra SAP Licensing costs!!
- Drive incremental sales using advanced mix and match promotions, and a variety of rebate offerings
- Automated accruals, rebate calculations and payments
- Generate and manage any type of rebate, including multi-tiered, complex percentage sales, growth and other outcome-based programs
- Channel Data Management solution for accurate, consistent and actionable channel data for rebate calculations

Challenges

- Accurate Tracking of Customer and Vendor Rebates
- Complex calculations based on high volume of data from disparate sources
- Variety of Rebates to be modeled and implemented including Retroactive Rebates
- Financial Liability and accruals calculations
- Timely and accurate payments and settlements
- Pooled rebates for a Customer/Vendor group
- Calculation of Gross to Net Profitability
- Supplier rebates based on sales to customers
- Third party agent commissions based on Sales
- Inaccurate Revenue forecasts
- Manual error prone calculations
- Revenue Leakage due to over payments
- Inconsistent, inaccurate and incomplete information from distributors, resellers and retailers for rebate calculations
